

I just found your site regarding high speed internet access for all Missourians. I only wish it were to come true! Our area of the State is so backward that we have been told there will never be such luxuries here. It was only in recent years that we came out of the stone age of party lines and within the last 9 to 10 years we were able to have any internet access. Now we have 1 available provider and are at their mercy. Our phone company is archaic.

If you want a real challenge, try to bring Black and Oats, MO. into this century as far as technology.

Thank You,  
Pat White  
Black, MO.
